I know why we used dose in the [Nonresponsive based on revised scope], but it is generally easier for initial discussions to discuss concentrations in the well. [Ex. 5 Deliberative Process (DP)] Just FYI.

Dear Lorie,

Regarding your question as to whether the Region memo 2 is sufficient to document perfluorinated acids (PFAS) as a pollutant or contaminant for the Blades HRS package, what exactly needs to be included in the HRS package depends upon how PFAS are going to be evaluated.

Nonresponsive based on revised scope

Can we use the attached memo from Region 2 to document PFAS being a pollutant or contaminant for our Blades HRS package? I think EPA's schedule is to have PFOA and PFOS classified as hazardous substances by October of this year, but that falls a little beyond our Sept. update.

Thanks!

Lorie
